

# Software License Compliance Solution

## 30 Days To Automated License Management

### Challenges

Software is an essential asset for successful businesses. However, poor software license management can unnecessarily increase the cost of software use, diminish its effectiveness, and worsen the results of the upcoming license compliance audit. With the Software License Compliance (SLC) solution, [Configure Consulting](#) can automate your current asset management process, help you to identify and mitigate compliance risks, and control your IT budget.

### The SLC Opportunity

Configure Consulting's Software License Compliance solution leverages software asset discovery and normalization to empower organizations with a single-source-of-truth around software utilization, compliance and budgeting. This straightforward and standardized mechanism aligns discovered software utilization data with business logic to support the management of contracts, entitlements, licenses, state of compliance and more.

### The SLC Value

The SLC solution reduces time and costs for tracking and maintaining software licenses of any type and allows organizations to get instant ROI, and avoid huge penalties and negative publicity in software audits.

### The SLC Implementation

The SLC solution can be deployed in several ways based on client's needs and requirements, including different modules of HP Asset Manager and not only, and a range of the alternative solutions for data imports:

- **Quick-start:** 30-day starter packaged geared towards setting up the foundation of the SLC solution, discovering software asset data from a small subset of the environment and delivering reports based on discovered information.
- **Contracts and Licensing Foundation:** Increasing auto discovery range and working with procurement teams to align discovered software asset data with licensing and contract-related business logic across top 5 software licenses.
- **SLC Sphere:** Software compliance and utilization across the organization's software assets including customization and reporting/dashboards.

For more information about the Software License Compliance solution please contact us at 1-800-987-8460 or send an email to [info@configureconsulting.com](mailto:info@configureconsulting.com) and one of our IT Asset Management experts will reach out to you.
